

Jenga Fortress

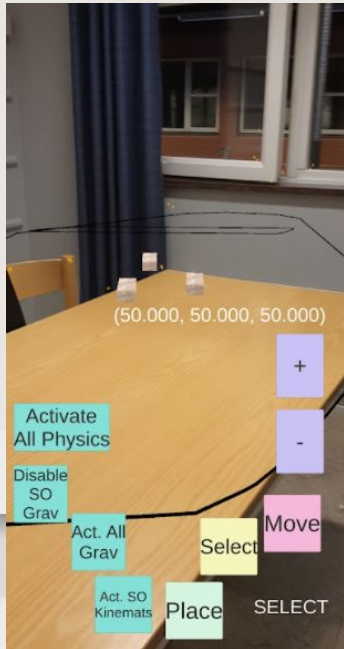

Still not Jenga

Team Sendhalp
Ibrahim Naboulsi
Tommy Ernsund
Chi Hong Chao

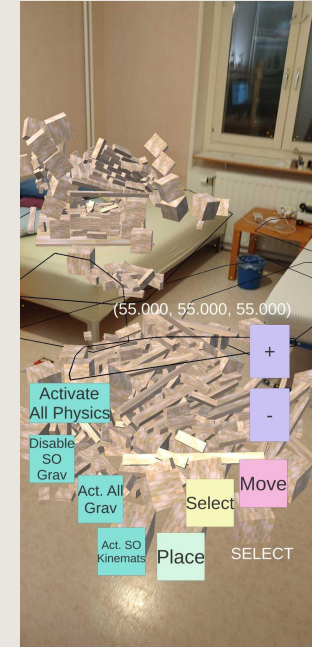

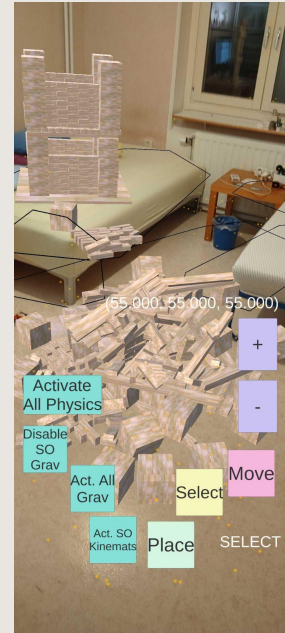

Achievements

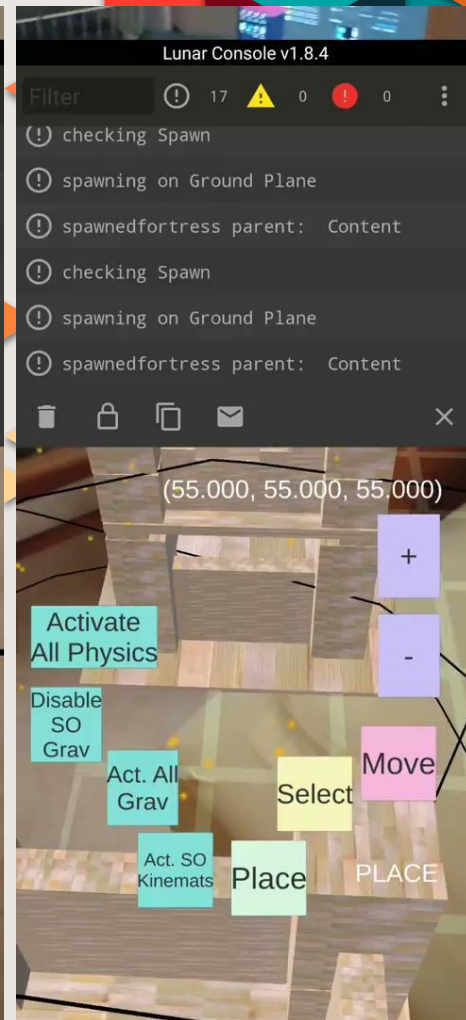

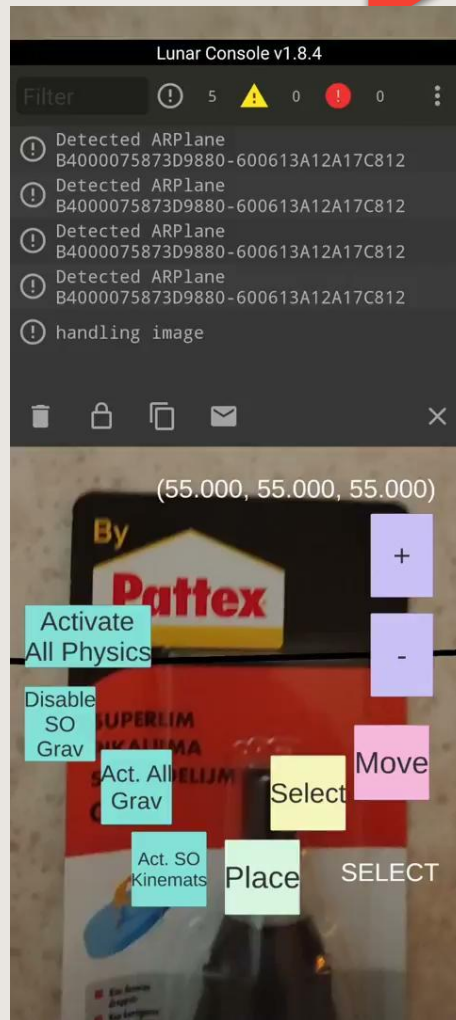

Can Fire Blocks

Can Place Fortresses

Video demo

The background features abstract geometric patterns composed of various colored triangles and hexagons. These shapes are arranged in clusters, primarily in the corners, creating a sense of depth and movement. The colors used include shades of orange, red, teal, and dark blue. The central text is a large, bold, dark gray sans-serif font.

Challenges below

Challenges

- Image tracking floatier than AR planes
 - Loses sense of space when not in view
- AR trash
- Scaling issues
 - Projectiles cannot spawn in front of player
- Height - bottom floor very low, need to crouch
- Beginning to think image tracking a lot worse than ar tracking
- Why are we still here just to suffer
- Cant feel my legs
- My arms and fingers

Image Tracking

Images which have worked

Conclusion: AR Image Tracking is Trash and only likes lame chinese medicine oil and superglue of the gel variety and dislikes ducks and other more exciting images that heal the soul

Images which have workedn't

Next steps

- Vacation
- Setting Boundaries for firing
- UI
- Obstacles between fortresses
- Game Rules
- Picking apart own fortress
- More explosions
