SUMMARY

- 2+ years of experience in software engineering with a diverse set of skills.
- Collaborative and adaptive in a fast-paced, culturally diverse startup environment.
- Global experience across Asia and Europe - polyglot in English, Mandarin, Cantonese, Portuguese, basic Swedish.

PROFESSIONAL EXPERIENCE

Software Engineer | Repli5

2022 - 2024

- Developed 15+ features using Python for WorldGenerator, a Blender add-on that automates the creation of 3D environments by working in diverse domains such as Backend, UI, Technical Writing, and DevOps.
- Drove over 100+ Scrum ceremonies, fostering a culture of collaboration and continuous improvement.
- Reformed and drove the UI team, integrating the UI/UX of 13+ features more closely with development processes by setting 50+ weekly meetings to continuously improve the workflow and interface for upcoming features.
- Improved documentation maintenance by dynamically pulling in key data from the codebase during generation.
- Streamlined build and deployment processes by scripting automation for various build stages, including artifact creation and deployment across environments using Google Cloud and Bitbucket Pipelines.
- Improved velocity by 25% by streamlining Scrum processes in a team of 5, resulting in higher-quality output.
- Ensured timely deliveries by collaborating with stakeholders to align product goals and manage expectations.
- Maintained the sprint and product backlog by assisting the product manager and the team in defining sprint goals, user stories, and acceptance criteria.
- Engaged in product demos for clients, eliciting actionable feedback that led to a reduction in reported issues.
- Reduced user frustration by collaborating with the UI Designer to align requirements, and address feedback.

EDUCATION

Master's of Science, Major in Game & Interaction Design

Chalmers & University of Gothenburg | Graduated 2022

- Arcade Game Engine (C++): Recreated the Tron (1982) Light Cycle minigame from scratch in SDL.
- Agile Dev. Processes (Node.js): Web app focused on following agile processes in a team of 9.
- AR Mobile Game (Unity): 2-Player physics game, explode enemy fortresses made of blocks. Performed exploratory and end to end testing to ensure 10+ critical features were functional and performant.

Bachelor's of Science, Major in Software Engineering & Management

Chalmers & University of Gothenburg | Graduated 2020

- Cyber-Physical Systems (C++): Docker microservices for a mini-vehicle to handle traffic situations.
- Distributed Systems: Dependency Visualizer of project code, run on 5 separate physical systems through LAN.

SKILLS

- Requirements Engineering
- Full Stack Development
- Software Architecture
- Embedded & Real-Time Systems Dev.
- Prototyping & Iteration
- DevOps and CI/CD
- Agile methodologies

TECHNOLOGIES

- **Programming:** Python, C#, C/C++, Java, JavaScript, Bash, Blueprints
- **Version Control:** Git, Perforce, Plastic SCM
- **Collaboration Tools:** Miro, Figma, Jira, Notion, Trello
- **Game Engines:** Unity, Unreal Engine 5
- **3D Modeling:** Blender
- **Containerization:** Docker
- **Databases:** SQL, NoSQL(MongoDB)
- **Web:** Node.js, Vue.js
